

Premix & Fortification

PHARMACHEM is leading supplier of custom premix & fortification systems to food, beverage & health product manufacturers worldwide since 1978.

Unlike typical dry blenders, we process many of our own vitamins & minerals and produce more botanical extracts used in health, energy & performance products than any other USA based manufacturer.

Our value-added process capabilities, thorough knowledge of health claim regulations and onsite formulation, analytical, microbiological & QC support provide ingredient and customer services unique to most ingredient vendors.

We make ingredients work.

PHARMACHEM is a service-oriented company providing customer-specific ingredient, product and process solutions with expertise in health & wellness, flavor and ingredient delivery.

Nutrient Premixes

Vitamin, mineral & nutrient blends for food, beverages, health products, dry mixes and more.

Pre-Flavored Blends

We can use your approved flavors, match a flavor, or create a new flavor profile for premixes & fortification.

Botanicals

We process hundreds of botanical ingredients including plant extracts, real fruit & vegetable powders, oil-powders, herbals & more.

Claim-Specific

Knowledge & experience with authorized, authoritative, qualified, structure-function and content claims regulations.

Condition-Specific

Custom fortification for nutrition, general or specific wellness, energy, performance, meal replacement or label claim.

Encapsulated Systems

Modify sensory, solubility, stability, function, appearance & release properties of your ingredient system.

Particle Size Control

Modify density, particle size distribution and sensory characteristics through granulation agglomeration & microparticulation.

At Your Speed...

Short lead times and just-in-time services or large campaigns with scheduled deliveries.
